

Should I have the Covid-19 Vaccine?

Stay safe from COVID-19

The vaccine is the only way to ensure that your immune system is ready to fight the virus if you are exposed to it.

- Traveller Movement
- Gypsy, Roma and Traveller Social Work Association

The Gypsy, Roma and Traveller Social Work Association encourages you to have the vaccination to prevent the further spread of COVID-19. If you are unsure whether to have it or not, we encourage you to seek advice from a health or social care professional.

Stay safe from COVID-19

Although the number of people dying is slowing down, vaccination will be important to help stop the pandemic altogether.

Worried about the vaccine?

As a group of professionals who represent the community in social work, we have heard that some families are worried that if they do not have their children vaccinated against COVID-19, social services will remove them. **We want to be clear this vaccine is NOT for children, it is for ADULTS ONLY.** The vaccine has not been tested on children because they are unlikely to get very unwell if they catch the virus. If this changes and there is a Covid-19 vaccine for children, choosing not to vaccinate your child is **NO** reason for social services to remove them.

Stay safe from COVID-19

We at the Gypsy, Roma, and Traveller Social Work Association recommend that anyone eligible for the Covid-19 vaccination should have it.
